

New Feature „TachoDownloader“ July 2020

Agenda

- TachoDownloader – General overview
- TachoDownloader – Prerequisites
- New Feature „driver grouping“
- Installation
- Registration
- Configuration
- Content of the "TachoDownloader" directory

TachoDownloader – General overview

- The TachoDownloader module enables the automated transfer of driver and vehicle files to a user-defined directory on his PC or another environment (e.g. server).
- The (single) login requires a user (fleet manager) created in TACHO*fresh*.
- "Autostart" function does not require a new login after a restart of the PC.
- By default, the files are stored in the "TachoDownloader" user directory, separated according to driver and vehicle data. Optionally, the user can also specify a different directory.
- The frequency of checking for new files is adjustable (in min).

TachoDownloader - Prerequisites

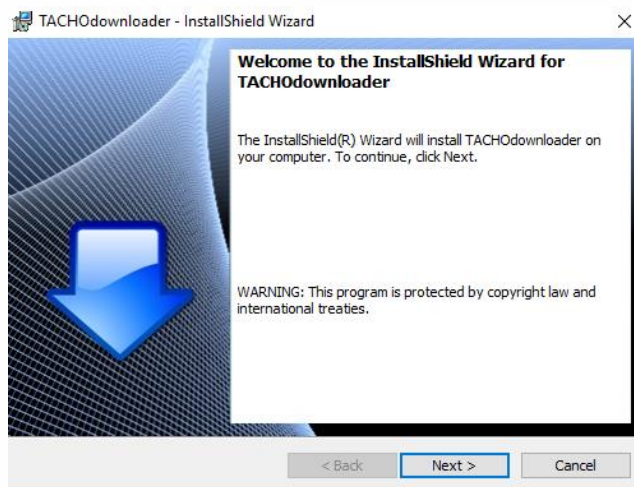

- For the installation of the TachoDownloader a Windows 10/64-bit environment is required.
- A 32-bit version can be provided on request by support.
- The installation can be done on the user PC or on a Windows server under the above-mentioned conditions.

New feature „driver grouping“

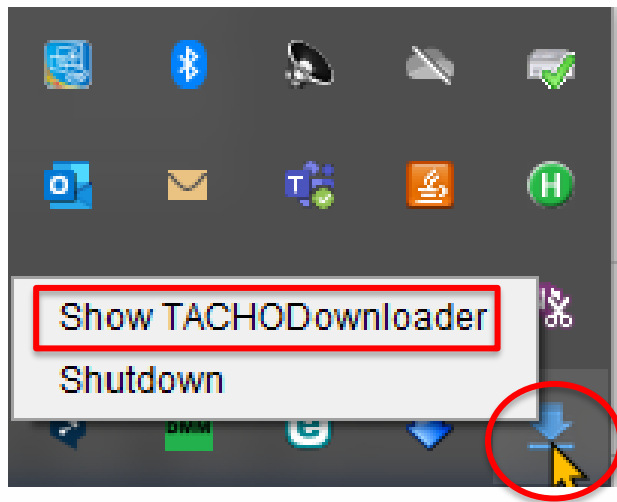

- In order to make the downloading of driver files more flexible, a new grouping feature was introduced that is independent of the vehicle fleet.
- This new grouping feature is the "driver group", which can be selected during configuration.
- For each vehicle fleet, the system automatically creates a driver group in which the drivers are grouped.
- No changes by the user are required for this.
- Only in future applications will the driver group be a selection/grouping criterion.

Installation - 1

- Installation is done by clicking on the link that is displayed after the user has logged in.
- Afterwards a self-explanatory installation runs.

Installation - 2

right mouse click,
Selection „Show TachoDownloader“

Registration

TACHODownloader

Login

Configuration - 1

1. TACHODownloader Manual download Check to activate (auto-downloading not active!)

Download Status
Download Configs
Basic Settings

TACHODownloader Folder
C:\Users\walth\TachoDownloader This is the basic working folder. It persists download configurations, access-data to TF Portal and download logs.

Save settings

You are currently logged in as 'tachodownloader' for customer 'N01036'.

Log out Currently you are logged in. If you logout, TACHODownloader stops downloading and you will have to login again. (And: All download configurations get lost if another user will be used for next log-in)

2. TACHODownloader Manual download Check to activate (auto-downloading not active!)

Download Status
Download Configs
Basic Settings

Create new download-config for vehicle-files Create new download-config for driver-files

Configured For	Check every * min	Files later than	Storage location
Fleet01 (V)	60	2019-10-01	C:\Users\walth\TachoDownloader\DownloadedVehicleFiles
Fleet01 (D)	60	2019-10-01	C:\Users\walth\TachoDownloader\DownloadedDriverFiles

Available fleets
Fleet01

Download files since
10/1/2019

Download Interval (min)
60

Storage location
C:\Users\walth\TachoDownloader\DownloadedVehicleFiles
Save Delete Close

3. TACHODownloader Manual download Check to activate (auto-downloading not active!)

Download Status
Download Configs
Basic Settings

Create new download-config for vehicle-files Create new download-config for driver-files

Configured For	Check every * min	Files later than	Storage location
Fleet01 (V)	60	2019-10-01	C:\Users\walth\TachoDownloader\DownloadedVehicleFiles
Fleet01 (D)	60	2019-10-01	C:\Users\walth\TachoDownloader\DownloadedDriverFiles

Available driver groups
Fleet01

Download files since
10/1/2019

Download Interval (min)
60

Storage location
C:\Users\walth\TachoDownloader\DownloadedDriverFiles
Save Delete Close

The destination folders can be changed user-specific

Configuration - 2
